

FOR IMMEDIATE RELEASE

LA Weddings Now Get Red-Carpet Photo Treatment With No Waiting Required

LOS ANGELES, CA, October 27, 2025 – Pixel Perfect Photography today announced its expansion into destination and multi-day wedding services, offering cinematic lighting, a same-day preview gallery, and a 48-hour final delivery workflow. These updates eliminate the traditional multi-week photo turnaround and meet the demand for editorial-quality wedding coverage in real time.

The new offerings bring red-carpet style to real weddings by combining mobile lighting kits, redundant file backups, and color-managed image delivery. Pixel Perfect's services now cover rehearsal-to-reception documentation with next-day highlights and full delivery within two days. The same system is also being applied to corporate clients in need of on-site headshots and live-event image sets.

"We want our couples to go from saying 'I do' to sharing their gallery before the weekend ends," said Jordan Block, founder of Pixel Perfect Photography. "We created a process that's fast without sacrificing quality, so they never have to wait to feel celebrated."

The studio, founded in 2023, has built a reputation for clean color, sharp editorial lighting, and fast delivery. Its new workflow supports both wedding and commercial clients who want high-end photography with a rapid turnaround—whether on a beach, in a ballroom, or at a board meeting.
